

# Experience by Design

Solutions / Driver & Passenger Experience / Experience by Design

## Design a unique experience for end-users

Let the users perceive your vehicle's environment as a meaningful experience. For passengers: larger windows for a luminous atmosphere, hopper windows for natural ventilation. For drivers: cab side opening and visual comfort solution thanks to AmpliSky.

Discover also our Reflective Design solution for a unique vehicle's design.

## Amazing glass

Saint-Gobain Sekurit Transport has the capability to produce extra-large sizes of glass for: windows, doors and windshields.

Create a lighted ambiance, enhance visibility and reduce travel distress through amazing bent enlarged glazing.

It is also possible to create a homogeneous design thanks to flush windows.

## Flush Hopper Windows

Enable natural ventilation inside the vehicle's body thanks to flush hopper windows, classic and slide opening function.

We offer different glass shapes: flat or curved; in different compositions: tempered, insulated glass and thickness.

## Cab side openings Windows

Offer to driver the ability to get side window without affecting the side visibility. Saint-Gobain Sekurit Transport proposes three alternative opening systems: sliding horizontal, sliding vertical or triangular shape with a rotation axis.

## Reflective Design

For a unique glazing design, Saint-Gobain Sekurit Transport presents you: chromatic paint applied onto the glass with a smooth transition onto the car body.

Create your own exclusive pattern applicable to the vehicle making it one-of-a-kind.
