Solutions / Green & Sustainable

Creating the new sustainable mobility

Saint-Gobain Sekurit Transport takes part in the energy transition of transportation, by offering greener solutions that will allow you to achieve your targets: comfort, reduce CO2 emissions and increase driving range for Electric vehicles. Thermal efficiency, weight-saving glazing, and sustainable design are among our products, suitable to every transport.

Thermal Efficiency

Reduce HVAC use while ensuring the best thermal comfort, will decrease the energy consumption of the vehicle, no matter the external weather. We offer anti-solar glazing solutions: from performant color range to the latest coated glazing.

Venus® Glass

Wide range of dark tinted glass to decrease solar energy transmission by absorption. Dedicated to passengers windows, roof and backlight.

Thermocontrol® Absorbing

Reduce the transmission of direct solar energy by absorbing infrared rays thanks to a specific interlayer.

Thermocontrol® Reflecting

Laminated glazing solution with a specific interlayer that reflects IR rays.

ComfortSky®

Our latest innovation for thermal control; a four-season glass product for hot & cold control. Suitable for all glass types (Tempered, Laminated, Insulated glass)

Weight Saving

Energy efficiency through light-weight saving solutions contributes to reduce CO2 emissions.

Discover Light Weight for a greener transport.

Sustainable by Design

Discover how design and sustainability creates the optimum environment for everyday transport.

Find out more about aerodynamics, extrusion and eco-design to build a greener mobility.

Services

With years of worldwide expertise, Saint-Gobain Sekurit Transport accompanies you through every step of your project by providing any required service and training on extrusion, framing, adapted logistics and more.
