Glass innovation is in our DNA

Saint-Gobain Sekurit Transport, part of the Saint-Gobain Group, with over 350 years of expertise in glazing know-how, has a strong culture of innovation. Our Innovation organization is focused on customer needs. We involve all stakeholders because we believe that collective skills play a decisive role in innovation. We want to surprise our customers with innovative solutions to impact the mobility of tomorrow.

Follow our story of innovations and discover what comes next.

What is next?

At Saint Gobain Sekurit Transport, we are constantly imagining the future by listening to our customers and end-users.

This is why we have conceived a safer and more comfortable workspace for the driver.

In order to guarantee safety, we have integrated alarms on the sides of the windshields which light up in the event of danger: a pedestrian or a bicycle in a blind spot for example.

We have also favored a dynamic sun visor in order to avoid the glare that the sun can cause. Finally, we have integrated an electroluminescent display that provides information on the journey.

Look at our latest innovation for a safer and more comfortable workplace for the driver.

Innovation mindset

At Saint-Gobain Sekurit transport ,the scope of innovation is wide and consist to develop glass products and systems, new production processes and services for our customers in order to face new challenges.

We follow and anticipate the latest trends on the transport market, to fulfill our client's needs and end-user's expectations.

We commit to have by 2025 every new product made by eco-innovation.
